EDUCATION

Ambalika Institute Of Management And Technology

Bachelors of Technology in CS (AIML)

9.18 SCPA (1st Year)

8.695 SGPA (2nd Year)

(Expected Completion) 2028

Lucknow, Uttar Pradesh

New Public School

Intermediate (Class XII) with 91.4%

May, 2024

Lucknow, Uttar Pradesh

PROJECTS

AMAZON Clone | HTML, CSS

GitHub: <https://github.com/Brijesh-pal4542/amazon.clone>

- Recreated Amazon's homepage layout to strengthen frontend fundamentals.
- Practiced responsive layouts, flexbox, and UI design principles.

Tic Tac Toe | HTML, CSS, JavaScript

GitHub: <https://github.com/Brijesh-pal4542/TicTacToe>

- Developed an interactive two-player game.
- Implemented game state management and win detection logic.
- Added theme switching and game reset functionality

Weather-App | HTML, CSS, JavaScript, Weather API

GitHub: <https://github.com/Brijesh-pal4542/Weather-app>

- Built a real-time weather application using REST APIs.
- Displayed temperature, humidity, visibility, wind speed, and AQI metrics.
- Implemented dynamic city-based search functionality.
- Improved API handling and asynchronous JavaScript skills.

E-commerce store | React, Tailwind, Express.js, MongoDB, Node.js

Live Demo: <https://e-commercefrontend-ivory.vercel.app/> | **GitHub:** <https://github.com/Brijesh-pal4542/e-commerce>

- Developed a full-stack MERN e-commerce application with secure JWT-based authentication, role-based access, and separate User & Admin dashboards.
- Built key e-commerce features including product search, filtering, shopping cart, secure checkout, order history, and real-time order tracking.
- Integrated Stripe, Razorpay, and Cash on Delivery (COD) payment options to provide a complete online shopping experience.
- Implemented an admin panel for product and order management with Cloudinary image uploads, inventory control, and order status updates.

Expense Tracker | React.js, JavaScript, React Router DOM, CSS3, Local Storage

Live Demo: <https://expense-tracker-3uo3.vercel.app/> | **GitHub:** <https://github.com/Brijesh-pal4542/Expense-Tracker>

- Developed a responsive expense management application with CRUD functionality, budget tracking, category-based organization, and persistent Local Storage integration.
- Built an interactive dashboard, dark/light mode, and mobile-friendly UI using React Hooks and React Router DOM for seamless navigation and enhanced user experience.

SKILLS

- **Languages:** Java, JavaScript, C(Basics), Python(Basics).
- **Web Development:** HTML5, CSS3, JavaScript, React.js, Tailwind CSS, MongoDB, Node.js, Express.js.
- **Tools & Platforms:** Git, GitHub, VS Code, Local Storage API, Vercel.
- **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming, Problem Solving.
- **Currently Practicing MERN Stack.**

ACHIEVEMENTS

- Solved 160+ Data Structures & Algorithms problems on LeetCode.
- Maintained 9.18 CGPA in B.Tech Computer Science (AI & ML).
- Built 4+ web development projects using Frontend and Backend.
- Contributor to GitHub with project-based learning.

SUMMARY

Computer Science (AI & ML) undergraduate with strong foundations in Java, DSA and MERN Stack Development. Built multiple frontend projects including a Developer Productivity Hub, Weather Application, and GitHub Profile Finder. Solved 1600+ DSA problems on LeetCode and actively Practicing Full Stack. Seeking software development internship opportunities to apply problem-solving and web development skills in real-world projects.
